

Christopher Kendrick

AI Deployment & Enablement Manager

kendrickchristopher@hotmail.com • (404) 358-0626 • LinkedIn • Concord, NC | Open to relocation – New York, NY

Professional Summary

Results-driven AI deployment and customer enablement specialist with 10+ years of experience designing and delivering training programs that accelerate product adoption across enterprise organizations. Proven track record of translating complex technical capabilities — including AI-powered tools — into accessible, high-impact learning experiences for audiences ranging from front-line employees to C-suite executives. Hands-on builder of AI automation solutions using Claude, Lovable AI, and ChatGPT. Experienced leading cross-functional implementation teams, managing concurrent enterprise accounts, and developing scalable enablement playbooks that drive measurable business outcomes.

Core Competencies

AI Product Enablement • Enterprise Onboarding & Adoption • Instructional Design • Executive Stakeholder Engagement • AI Tool Development (Claude / Lovable) • Change Management • Scalable Playbook Development • Workshop Design & Facilitation • Cross-functional Team Leadership • KPI Monitoring & Optimization • Technical Implementation • Customer Lifecycle Management

Career Experience

Customer Onboarding & AI Enablement Manager

Mews PMS | Prague, CZ (Remote) 2024 – Present

- Built an AI-powered reservation file converter using Lovable and Claude that fully automated a previously manual data migration process — saving Onboarding Managers and clients hours to days of effort per implementation.
- Designed and delivered monthly system training to new Mews clients and new hires via MS Teams, translating complex software features into practical, accessible workflows for diverse enterprise audiences.
- Reduced onboarding time by 20% by designing a structured onboarding program with standardized workflows, user manuals, and best-practice guides that improved self-service adoption and client confidence.
- Successfully managed 10–20 enterprise customer accounts simultaneously, guiding each from initial configuration to live deployment within a 2–4 week cycle.
- Integrated enterprise properties with key partner platforms — SiteMinder, Booking.com, Expedia, QuickBooks Online — ensuring seamless operational connectivity at go-live.
- Managed a team of onboarding consultants, facilitating knowledge-sharing, troubleshooting escalations, and professional development to maintain consistent service delivery quality.
- Built a Salesforce-to-Slack daily reporting tool using Claude that surfaces real-time project status for all assigned accounts, increasing management visibility and team accountability.
- Built a project handover automation with Claude and Lovable that generates management-ready status reports, ensuring zero disruption during planned absences.

Training & Implementation Manager

PurpleCloud Technologies | Atlanta, GA (Remote) 2018 – 2024

- Cut training time by 60% (5 days → 2) and implementation time by 50% (2 months → 1 month) through redesigned onboarding curriculum and streamlined delivery processes.
- Guided C-suite stakeholders through software adoption by identifying individual training needs, tailoring sessions, and connecting product capabilities to business objectives.

- Led live webinars, on-site training sessions, and produced recorded instructional content using ScreenPal, ensuring flexible and scalable enablement across distributed enterprise teams.
- Configured and integrated Property Management Systems (Opera, Maestro) to meet diverse customer environments, translating complex technical requirements into functional enterprise deployments.
- Developed and maintained up-to-date training materials, client newsletters (Constant Contact), and product update communications to sustain engagement and adoption post-launch.
- Documented client bugs, feature requests, and usability concerns in Zendesk and HubSpot, routing insights to engineering via Pivotal Tracker to inform product development.

Systems Administrator & Senior Support Analyst

Amadeus | Atlanta, GA 2013 – 2018

- Provided enterprise-level technical support and systems administration for Hotel SalesPro users across North America; recognized as a Top Performer in 2017 for resolving the second-highest number of support cases company-wide.
- Led performance analyses and continuous improvement initiatives across the product support function, reducing employee downtime through proactive training and change management.
- Managed hardware and software migrations — including legacy-to-new-platform transitions — with minimal business disruption.
